At the Stores Named Below A 10-Day Tube of Pepsodent

That Film on Teeth

Destroys Them. Watch It Disappear

Science Saves Teeth In a New Way Now

Dental science has found that an important cause of tooth troubles lies in a slimy film. You can feel it with your

It has also found that old methods of teeth cleaning do not end this film. That is why well-brushed teeth still discolor and decay - why tartar forms and pyorrhea starts. Statistics show that, despite the tooth brush, these troubles have constantly increased.

And now dental science has found a way to combat that film. That fact has been proved by many clinical tests. And this offer is made of a 10-day tube to urge everyone to

That film is what discolors, not your teeth. It is the basis . of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause Millions of germs breed in it. In fact, dentists call this

film "bacterial plaque." Those germs, with tartar, are the chief cause of pyorrhea. Thus nearly all tooth troubles are now traced to the film. The film is a clinging substance. It gets into crevices,

hardens and stays. The ordinary dentifr e cannot dissolve it. A soapy tooth paste even helps it to become more re-So the tooth brush has proved disappointing. It removed

food debris, but it failed to end film. And that film is the teeth's chief enemy. New that film can be efficiently combated. The method

is embodied in a dentifrice called Pepsodent. Its results are quick and convincing. A

10-day test will prove a revelation to you. We ask you to make it at our cost, then judge for yourself what Pepsodent means to your teeth.

The New-Day Dentifrice

This 10-Day Test Will Convince You

Analysis shows that the film is albuminous. So Pepsodent is based on pepsin, the digestant of albumin. The object is to dissolve the film, then to constantly combat it.

The great difficulty lay in the fact that pepsin must be activated. The usual agent is an acid, harmful to the teeth. So pepsin long seemed impossible.

But science has now evolved a harmless activating method. Five governments have already granted patents. That method - used in Pepsodent - seems to solve completely this great dental problem.

Able authorities have proved these results by many clinical tests. Some of them have watched the effects for years. Their opinion is that Pepsodent inaugurates a new dental era. And now thousands of dentists all over America are urging its adoption.

Now comes the problem of proving these facts to the millions. And doing so quickly, for film removal is tremendously important,

We do this by supplying a 10-Day Tube for test. The stores named below have them in stock. They will give one free to you this week if you present this coupon.

Do this in fairness to yourself. Use Pepsodent like any tooth paste, and watch results. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten-how they glisten-as the fixed film

disappears. Then form your own conclusions. You will never again try to clean teeth without it, or let your children lack it. Cut out

the coupon now.

Any Store Named Below Will Supply the Free Tube on This Coupon

REXALL STORES
